

PRO Charging Systems

EXCEPTIONAL QUALITY • PERFORMANCE • RELIABILITY

Eagle Performance Series Onboard Lift
7.75"H x 8.50"W x 7.10"L

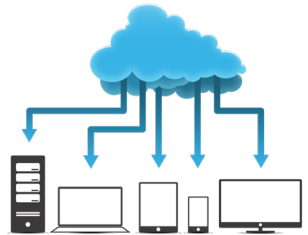

Eagle Performance Series Onboard
5.75"H x 8.50"W x 9.00"L

Connect your team with the equipment yard...

FLEET MANAGEMENT SYSTEM

Access crucial equipment information remotely via phone, tablet or computer.

- State of Charge (SoC)
- State of Health (SoH)
- When equipment needs to be charged
- Approximate location of equipment on your yard

Eagle Performance Series chargers power your rental equipment.

- Enhance battery performance and increase life span
- Charge 20% faster than the fastest competitor's charger
- Batteries last 20%-25% longer as a result of more intelligent charging
- Chargers are fully repairable

Identify battery issues before they become costly problems and manage your fleet with ease and efficiency.

PROView™ Link allows you to monitor the condition of your batteries.

Free to download

A sample of data you can access—

- State of Charge (SoC)
- State of Health (SoH) of your battery pack
- Detailed Historical Charging Data

Fleet Management System provides real-time information.

BATTERY MAINTENANCE

Did you know? A few minutes a day can save thousands of \$\$\$ each month!

Battery packs are only as good as the weakest link! One compromised battery will pull the whole pack down. With our system you can easily identify and replace only bad battery(s) ... not the entire set.

So, why don't more people test? Conventional testing methods are time consuming, messy and inaccurate. Many purchase all new batteries, unaware that some or all batteries are still good!

Testing your batteries is as easy as 1, 2, 3...

1. Charge up to 4 batteries individually with our **Battery System Balancer**, allowing each battery to reach its maximum capacity.
2. When charging completes, attach the **Battery Discharger** to the batteries, push a button, walk away.
3. When testing concludes, the **Battery Discharger** displays the run time of each battery.

Battery System Balancer

Models i615BSBQUAD (6V), i815BSBQUAD (8V), i1215BSBQUAD (12V)

Quad Battery Discharger

Model BD6812QUAD

Optional: 6ft extender cables for both the Balancer and Discharger.

Charger/Maintainer - Model S1

- For 6, 8 and 12 Volt Lead Acid, AGM and Gel Batteries
- Charges and Maintains 1 to 10 batteries (of the same voltage) simultaneously and independently
- Various algorithms allow you to choose the profile best suited for your batteries

Small Form Factor
1" x 3" x 14"
3.76 lbs.

Pro Charging Systems is the world leader in the development and manufacture of advanced battery charging systems and energy management solutions.
